The data in these tables are rounded and percents may not add to 100 due to rounding. Commute shed boundaries are derived from the MAG travel demand forecasting models which incorporate the HERE speed database. Boundaries are created using three hour morning peak drive times (6AM to 9AM). Data can be found online here:
<http://mag.ms2cloud.com/tdms.ui/ttds/dashboard/index?loc=Mag>

U.S. Census Bureau, 2011-2015 American Community Survey (ACS) 5-Year Estimates: ACS data are based on a sample and are subject to sampling variability and nonsampling error. The degree of uncertainty for an estimate is represented through the use of a margin of error (MOE). The MOE and effect of nonsampling error is not represented in these tables. Documentation can be found on the ACS website (www.census.gov/acs). The MOE can be found on the American FactFinder website (<http://factfinder2.census.gov>).

2016 MAG Employer Database: Includes only employers with 5 or more employees.
